### PROFILE

Motivated and hardworking entry-level React JS developer with a strong understanding of web development principles and experience working on several React projects. Proficient in HTML, CSS, and JavaScript, with excellent problem-solving skills and the ability to learn quickly. Seeking an entry-level position to grow and develop my skills further.

### SKILLS

#### Technical skills

- Proficient in HTML, CSS, and JavaScript
- Strong knowledge of React.js, including React Router and Redux
- Experience working with Material UI, React Icons, Font awesome and Bootstrap frameworks
- Skilled in data retrieval and manipulation using Axios. with experience in consuming RESTful APIs and handling data in JSON format.
- Ability to write clean and maintainable code
- Strong problem-solving skills and ability to work collaboratively in a team environment

#### Soft skills

- Leadership skills
- Team player
- Flexibility
- Project Management

### PROJECTS

**Cinema's world** : <https://cinemasworld.netlify.app/>

It's Movie website which shows upcoming movie and trending movies and also search movies functionality and also I have used TMDB Api for movies data and also add react skeleton loading

Technologies I have used :

- TMDB movies API
- React skeleton Loading
- Axios
- React router

**Coin Info** : <https://cryptoinfokingdom.netlify.app/>

It's crypto currency website. It shows real-time crypto currency's price and many more information. and also with search coin functionality. for real-time data I have used Coingecko API

**E-store** : <https://ecomstorebasic.netlify.app/>

It's basic e-commerce website with categories and also add to cart functionality and react skeleton loading effect

Technologies I have used :

- React redux
- React router
- Bootstrap
- Font awesome icons
- Material Ui Skeleton Loading
- Fakestore API

**Employee's Data CRUD With Firebase Realtime Database**

<https://employeesdatacrud.netlify.app/>

It's simple basic employee record management website where we can Add, Read, Update and Delete data and also in detail we can scan QR code and also get more information

- create Firebase Api for real time database

Technologies I have used :

- Firebase Real time database
- Axios
- React router
- Material UI icons
- Bootstrap
- React QR code

### LANGUAGES

- Gujarati
- Hindi
- English
